Host Andrea Valtom,
Straight A+ Student

**Think like a Genius
Straight A+ Student.**

Study smarter, not harder, using the simply genius strategies of top students.

"Chester's memory strategies are pure genius. In our company's latest Think like a Genius Straight A+ Student product, we feature studying and memorization strategies of 3 amazing A+ students. The students we feature naturally used many of the memorization concepts that Chester talks about, which is to use multiple senses (such as sight, sound, touch, etc.) to encode information. However, Chester takes those strategies to a whole new level. His strategies are so good that in fact we feature him as an additional resource for students who really want to develop powerful memory strategies. Learning the studying strategies of top students we feature in our product and Chester's memory encoding strategies will put any student on the path to Genius."

Taryn Voget, CEO, Everyday Genius Institute
